Kitchen, Dining, Family, Media and **Master Bedroom**
- Wireless Router
- iPad Mini 16Gb Wi-Fi
- Fixed Flush Mount Wall Dock

- Smart Intercom Pack
- Multi-Room Audio Pack
- Smart Home Audio Visual Control Pack
- Power Monitoring Pack
- Smart Alarm Pack

Smart Home Essentials

- Smart Home design begins with Push Controls, the most intuitive, **affordable and scalable** control system available on market today.
- Push delivers on the promise of the connected home. With one simple control, you have the capability to master virtually any device, system or appliance.
- AV, Music, Lighting, Energy Management, Access Control and Security, are just the beginning. With Push, the possibilities are endless and are only limited by your imagination. Why not add Climate control? Blind control? CCTV ?
- Once you start to understand the possibilities of home automation scheduling, you can come up with any number of useful and creative solutions to make your life better.
- Push Controls can deliver a user friendly system that combines lifestyle advantages with **environmental benefits**.
- No need to run from room to room to turn off each light, nor the need to waste power because you forgot to turn off the lights in the room you already walked out of. With a Push of a button activate the '**All Off**' scene and all lights attached to the system turn off.
- Never get **bill shock** again, Wiser Link allows you to graphically monitor usage and costing of your power. You can set targets of power use and Wiser Link can even email you when you are nearing your preset target.

Install

HNC AVA will Install, commission and give user training to the buyer.

Service

Smart Home Essentials

Items to be delivered and installed after handover:

- iPad mini in wall dock;
- Intercom door station;
- Sonos Connect Amplifier;
- Push PC4- Integration Controller for AV and Automation.

Installation requirements prior to booking install.

Please ensure that you have completed the following :

- Installation of AV equipment and cabinetry for equipment not supplied by Harvey Norman Commercial and must be setup and available prior to our programming.
- Foxtel service if required is supplied by Telstra or Optus.
- Home owner needs to supply their own fixed NBN modem and internet service. This has to be in and running prior to our installation. Sonos products, Intercom, Energy Management and Push Controls require an active Wi-Fi / internet network to operate.

For final installation and programming please call or email from 8AM-5PM on Monday-Friday.
